

# IMPACT OF COVID-19 ON HOUSEHOLDS IN KIGALI AND THE SECONDARY CITIES

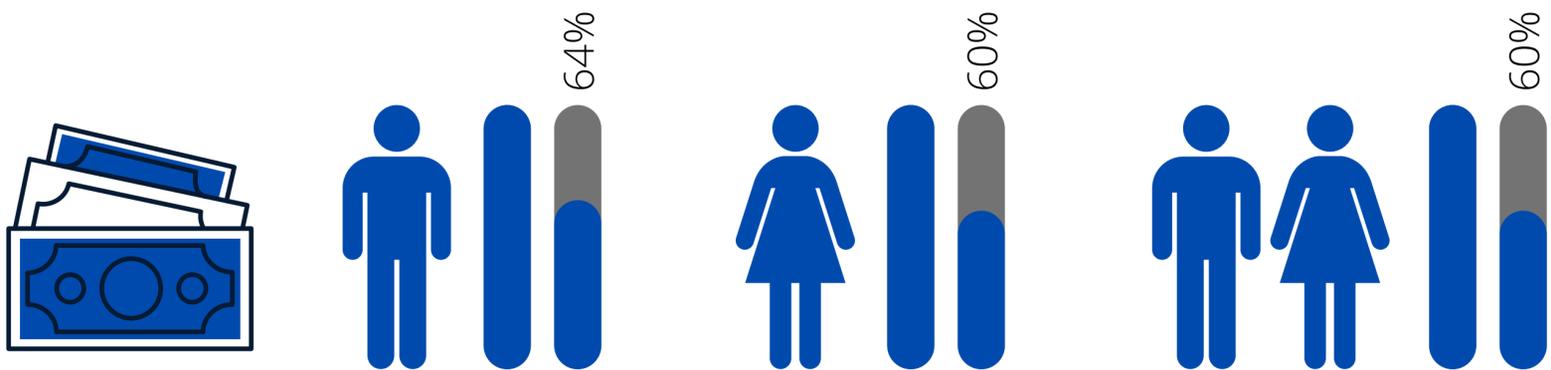

## INTRODUCTION

IPAR-Rwanda carried out a survey of households in Kigali and the Secondary cities to gather evidence on the impact of Covid-19. The survey uses a probability sample of household heads and interviews were carried out by phone in August 2021.

## HOUSEHOLDS SURVEYED

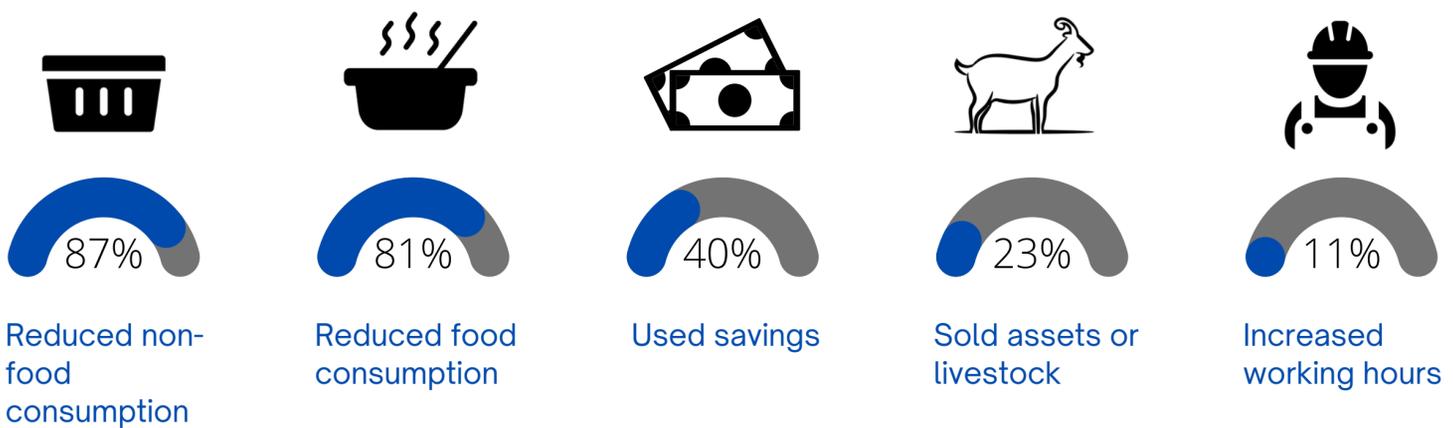

## INCOME FELL SIGNIFICANTLY DUE TO COVID-19

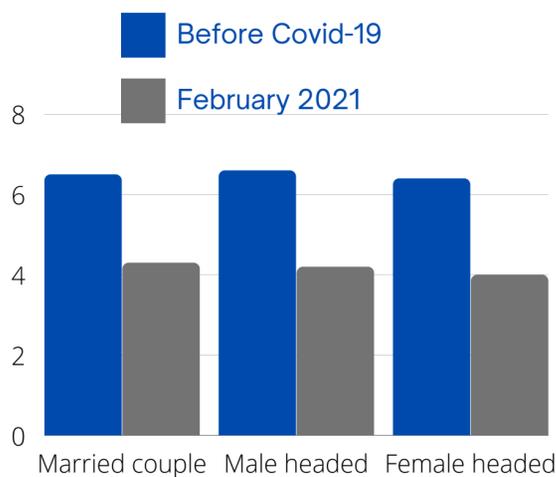

All three types of household saw falls in income in February 2021 compared to before March 2020

## HOUSEHOLDS TOOK A RANGE OF STEPS TO MAKE UP FOR LOST INCOME

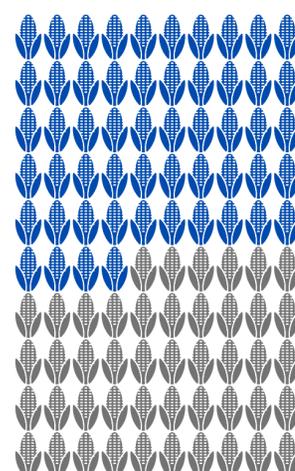

## LIFE SATISFACTION FELL DUE TO COVID-19

Self-reported life satisfaction on a scale of 0-10 dropped on average across all household types in February 2021 compared to before Covid-19

## OVER HALF OF HOUSEHOLDS REPORTED THEY WERE UNABLE TO AFFORD SUFFICIENT FOOD

54 per cent unable to afford sufficient food to meet the needs of the household

## FURTHER INFORMATION

IPAR-Rwanda will shortly be publishing further analysis of the household survey. There will be future rounds of the survey to continue to monitor the impact of Covid-19 over time. For more information see <http://www.ipar-rwanda.org>.
